Length 3536: 915mm
Length 3548: 1200mm
Material: Hardened Steel
Chain sleeve: Grey
Model Numbers: 3536 and 3548

The **Toughlok™** range of Squire chains offers excellent value for money. The chain, like the higher specification Squire chains is hardened, so is still a good choice for securing valuables.

The chain is recommended for securing items within sheds, when combined with a Squire wall or ground anchor. It is also recommended for securing, garden furniture, barbeques, tools, and storage areas. As this chain is lighter than others in the Squire range, it is particularly suitable where the chain needs to be carried, for example if used for locking a bicycle.
