

DCL1 and DCL2 padlocks

Stainless steel padlocks

DCL1 Padlock

Stainless steel lock body with closed shackle design offers high level security for domestic and commercial applications. For extra security, the 5 pin tumbler lock mechanism is protected by a hardened steel anti-drill plate. There is a key fob on the key for easy identification.

Available keyed alike.

Recommended for

Vans, industrial units, lock ups and storage areas.

DCL2 Padlock - rustproof

The DCL2 all stainless steel padlock delivers the same level of security as the DCL1, but has the added benefit of being RUSTPROOF. Also available keyed alike.

Recommended for

Outdoor areas, coastal, boats, marine and harsh environments.

DCL1 Padlock with DHC1 Hasp - lock and hasp sets

The DCL1 is also available as a value pack with the DCH1 hasp and staple.

Recommended for

Vans, commercial vehicles, gates, garages and lock ups.
