

## HEB50 - Half Euro Cylinder Padlock

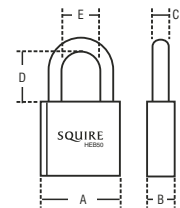

A padlock suitable for a Euro Half Cylinder, requiring no modifications

- Accepts SQUIRE Half Euro Cylinder HC1 40mm (31 9) with no modifications
- Accepts most other manufacturers Half Euro Cylinder of the same dimension
- Solid brass body, nickel plated
- Hardened steel shackle
- Spring locking, double locking.

The versatile HEB50 is another addition to the Squire family of quality padlocks. No more having to cut, drill and tap cylinders and hope they work. Just take any of our HC1 40mm (31-9) cylinders and drop it in to the padlock body, secure in place using the special screw supplied and you have a fully working padlock.

See diagram for dimensions.
